

May 10, 2018

Attending: Mario, Tom, Alan Buxey, Valentin

Mario Reale at GARR will update us on GÉANT activities in support of Sirtfi.

https://docs.google.com/presentation/d/1h11gnSRZBee31moSTeSasoJ7ch9Ds-6FBiCHkvXy_il/edit?usp=sharing

Proposed agenda:

1. Agenda bash
2. Mario's update
 - a. Identity Provider check tool for SIRTFI assessment for Service Providers
 - b. Contact address verification tool
 - c. eduGAIN Support and SIRTFI
 - d. Q&A
 - e. Any take-aways to be sure to reflect in the Federated Security Incident Response Procedure paper?
3. Back to "[Federated Security Incident Response Procedure](#)" paper
 - a. Any reactions upon (re-)reading the AARC version?
 - b. Is there a specific date by which we should aim to have the REFEDS version ready? What starves, or veers, until it is ready?
 - c. Two work streams:
 - i. Writing the paper itself
 - ii. Connecting with related communities/orgs
 - iii. Volunteers?

Re item #2, Mario gave a great presentation to Alan and Tom, who (of course!) had many questions. The contact-checking tool looks impressive and provides a good basis for concrete discussion about who should have what role in using it, or perhaps instances of it. In particular, the WG should discuss whether or how this should be addressed in the Federated Security Incident Response Procedure paper.

We did not have time for item #3.
