

Sirtfi TIIME Session

- 17 people 14:15 CET 22nd Feb

- Would be helpful to display genuine support for Sirtfi per federation, to help participants know where to direct users, e.g. part of knowledge base used by eduGAIN support platform.
- Ideas
 - Run tabletop exercise (role play)
 - Run contact responsiveness test
 - Produce further guidance for Federation Operators, IR plan and procedures
 - Produce guidelines for when to contact whom and the purpose of the security contacts
 - Define message templates, with possible form
 - Concern on legality of keeping logs, address this
- Tools
 - Note: don't bother with IdP/SP tooling, it's a distraction and could be misleading and poorly used
 - non-fed op operated mechanism for entities to assert Sirtfi independently of their federation's tool/process
 - Establish mailing lists for discussion, report sharing, consider opt-in vs scraping from metadata
 - Phase N+1 enhance ID Events suitably

ACTIONS

- consider mailing lists & communication channels (discuss between WG members)
- plan contract responsiveness test & tabletop exercise (combine with GN4)
- H to update workplan on Wiki
