REFEDS Data Protection Code of Conduct Entity Category 1

- 2 Version 2.0
- 3

Overview 4

5

6 This Code of Conduct sets the rules that Service Provider Organisations can commit to when they 7 want to receive End Users' Attributes from Home Organisations or their Agent for enabling the End 8 Users to access their Services. Home Organisations will feel more comfortable to release affiliated 9 End Users' Attributes to the Service Provider Organisation if they can see that the Service Provider Organisation has taken measures to properly protect the Attributes.

10 11

12 This document defines a SAML 2.0 Entity Category attribute for Service Providers that claim 13 conformance to the Data Protection Code of Conduct and a SAML 2.0 Entity Category support attribute 14 for Identity Providers that are willing to interact with Service Providers conforming to the Data protection 15 Code of Conduct. This document also defines the SAML 2.0 metadata requirements for Identity and 16 Service Providers claiming the Entity Category attribute.

1. Definition 17

18

19 Candidates for the Code of Conduct Entity Category are Service Provider Organisations that are 20 willing to support and implement the REFEDS Data Protection Code of Conduct Best Practice 21 quidelines [CoCo].

22

23 This Code of Conduct is addressed to any Service Provider Organisation established in any of the 24 Member States of the European Union and in any other countries belonging to the European 25 Economic Area (Iceland, Liechtenstein and Norway).

26

27 Furthermore, Service Provider Organisations established in any third country or International 28 organization offering: 29

- an adequate level of data protection in the terms of Article 45 of the GDPR, or •
- appropriate safeguards in the terms of Article 46 of the GDPR •
- 33 can also subscribe to this Code of Conduct.
- 34

30

31

32

- 2. Syntax 35
- 36
- 37 The following URI is used as the Attribute Value for the Entity Category attribute and Entity Category 38 support attribute:

43 By asserting a Service Provider to be a member of this Entity Category, a registrar claims that:

- The Service Provider has applied for membership in the Category and complies with this entity category's registration criteria.
- 46
 2. The Service Provider's application for using the Code of Conduct Entity Category has been reviewed against the registration criteria and approved by the registrar.
- 48 In possessing the Entity Category Attribute with the above value, a Service Provider claims:
- that it is bound by :
 - The data protection laws in the European Union or European Economic Area,
- 51 or can demonstrate:
- 52 o an adequate level of data protection in the terms of Article 45 of the GDPR;
- 53 o appropriate safeguards in the terms of Article 46 of the GDPR;
- that it has committed to the Data Protection Code of Conduct for Service Providers [CoCo].
- that it conforms to the Metadata Requirements for Service Providers (section 5).

The Service Provider is responsible for the service it offers and its legal compliance with the Code of
 Conduct. The Service Provider is regarded as authoritative about its Privacy Notice and the attributes
 the service requests.

59 By asserting the Entity Category support attribute, an Identity Provider claims that it releases the 60 requested attributes to a Code of Conduct committed Service Provider without administrative 61 involvement.

62 4. Registration Criteria

63 When a Service Provider's registrar (normally the Service Provider's home federation) registers the
64 Service Provider in the Entity Category, the registrar MUST at least:
65

- 1. Check the grounds under which the Service Provider supports transfer of data (see section 1) as either:
 - Operating in a country within the European Union or European Economic Area or a country, territory, sector or international Organisation with an adequacy decision pursuant to GDPR Article 45;
 - b. Using appropriate safeguards pursuant to GDPR Article 46 and committed to only receiving data from organisations where safeguards have been agreed.
- 2. Ensure that the Service Provider is committed to supporting the Code of Conduct Best Practice.
- 3. Ensure that the SAML 2.0 elements conform to the Metadata Requirements for SP entities.
- 4. Remind the Service Provider to check that the Service Provider's mdui:Description and mdui:DisplayName elements are understandable and useful for common end users.
- 5. Check that the Service Provider's Privacy Notice document is available.
- 6. Remind the Service Provider to make sure that the list of requested attributes is consistent with the Privacy Notice document.
- 7. Ensure they have an appropriate administrative contact that is aware of the Service Provider's commitment to the Code of Conduct.

84
```

5. Metadata Requirements for Service Providers

- 86 5.1 mdui Requirements
- 87 5.1.1. SPs MUST provide at least one mdui: PrivacyStatementURL value.The

88 PrivacyStatementURL MUST resolve to a Privacy Notice which is available to browser users

89 without requiring authentication of any kind.

- 90 5.1.2 SPs MUSTs provide at least one mdui: DisplayName value.
- 5.1.3 SPs MUST provide at least one mdui: Description value. It is RECOMMENDED that the length
 of the description is no longer than 140 characters.
- 5.1.4 For all mdui elements, at least an English version of the element MUST be available, indicated by
 an xml:lang="en" attribute.
- 95 5.2 Attribute Requirements
- 96 5.2.1. If the SP is using SAML Subject Identifier Attribute Profile, it MUST provide subject-id:req
 97 entity attribute extension to indicate which one of the identifiers pairwise-id or subject-id is necessary.

5.2.2. If the SP is requesting other attributes than the identifiers above, it MUST provide
 RequestedAttribute elements describing the attributes relevant for the SP. The
 RequestedAttribute elements MUST include the optional isRequired="true" to indicate that
 the attribute is necessary.

102 6. Deployment Guidance for Service Providers

A Service Provider that conforms to this entity category would exhibit the following entity attribute inSAML metadata:

105

106 An entity attribute for Service Providers that support the Entity Category: 107

7. Deployment Guidance Identity Providers

An Identity Provider indicates support for the Entity Category by exhibiting the Code of Conduct entity attribute in its metadata. By indicating this support, the Identity Providers asserts that they are willing to interact with and release attributes to Service Providers conforming to the Code of Conduct.

Further support guidance for Identity Providers is available [CoCoHomeOrg].

An entity attribute for Identity Providers that support the Entity Category:
