Notes

- discussed the LoA wireframe and start further developing it: https://docs.google.com/document/d/15v65wJvRwTSQKvIae_gGuEvxLi3UJbaOXs9eLtsyBl/edit#
- relation to BIRCH
  - mapping to BIRCH or Kantara ALs would be helpful approach when possible.
  - do the mapping exercise in the end
- ePPN reassignment
  - clarify: ePPN can change over time, but ePPN cannot be re-assigned to another person
  - another tag to indicate that ePPN is reassigned but has a fallow period of 1 year (BIRCH has 400 days)
- binding between the subject and their credential?
  - credential delivery (initial, renewal; password reset)
  - credential revocation
  - how to be specific enough without opening loopholes?
  - Does it need its own section/dimension or can it be part of the identity concept or authentication section?
- what is going to be the role of federation operator?
  - what is federation operator's role in self-asserted assurance levels?
- next vc: doodle poll
