Introduction

The Data protection Code of Conduct v2 describes an approach to meet the requirements of the EU GDPR in federated identity management. The Data protection Code of Conduct defines behavioral rules for Service Providers which want to receive user attributes from the Identity Providers managed by the Home Organisations. It is expected that Home Organisations are more willing to release attributes to Service Providers who manifest conformance to the Data protection Code of Conduct.

REFEDS Data Protection Code of Conduct ver 2.0

Normative documents

- Code of Conduct 2.0 for Service Providers
- Code of Conduct 2.0 Entity Category
