REFEDS MFA Profile v1.1 available for Public Feedback

(Posted: September 13, 2022)

A draft version of the REFEDS MFA Profile v1.1 is now available for public feedback. This update continues our effort to make the REFEDS MFA Profile clearer and easier to adopt. With V1.1, we focused on clarifying key implementation details and making the Profile usable with multiple messaging protocols (SAML and OIDC), while staying true to the intent of the original Profile.

Visit the Community Chat / Feedback page to learn more. Then join on October 6 for the REFEDS Community Chat.

About the MFA Subgroup

The MFA Subgroup is tasked by the REFEDS Assurance Working Group to update the REFEDS MFA Profile to make it easier to understand, interpret, and apply, so that:

- an federation SP operators can map it to their strong authentication requirements and trust that a federated IdP has performed MFA adequately.
- an IdP operators has sufficient deployment guidance to make better decisions and test for success.
- software implementers can better understand why, when, and how to support MFA signaling using the REFEDS MFA Profile in their products.
