

Metadata Extension Schema

This is an XML Schema for REFEDS-defined metadata extensions.

Any attributes defined within the REFEDS namespace should be added to this schema.

An XSD for download is available here: [refeds_metadata_extension_schema.xsd](#)

```
<?xml version="1.0" encoding="UTF-8"?>
<xs:schema
  xmlns:xs="http://www.w3.org/2001/XMLSchema"
  targetNamespace="http://refeds.org/metadata"
  elementFormDefault="qualified"
  attributeFormDefault="unqualified"
  blockDefault="substitution"
  version="2.0">
  <xs:annotation>
    <xs:documentation>
      Document title: Schema for REFEDS metadata extensions
      Document identifier: Metadata Extension Schema
      Location: "https://wiki.refeds.org/display/Stan/metadata+extension+schema"
      Revision history:
      V1.0 (29 March 2016):
      Initial version with contactType attribute.
    </xs:documentation>
  </xs:annotation>
  <xs:attribute name="contactType" type="xs:anyURI"/>
</xs:schema>
```
