

# SCHAC\_1.5.0\_issues

A few issues were discovered in SCHAC 1.5.0 release.

## PDF: 1.5.0 - 2015-04-12

### On page 10 in 'schacHomeOrganizationType' Format

The format description does not make much sense like it is now. Especially the part 'and assigned by the SCHAC URN Registry for this attribute at ' does not match the context.

Also updating the reference to ISO3166-2 would make sense.

How about something like this?

Format: urn:schac:homeOrganizationType:<country-code>:<string> <country-code> = int

<string> MUST be registered in the [SCHAC-URN-Registry] <country-code> = valid two-letter [ISO3166-2] country code

<string> from a nationally controlled vocabulary, published through the URI identified at the [SCHAC-URN-Registry]

### Typo on page 10 in 'schacHomeOrganizationType' Examples

Wrong

urn:schac:homeOrganizationType:eu:higherEducationalInstitution

urn:schac:homeOrganizationType:eu:educationalInstitution

Correct (cf. [SCHAC URN registry](#))

urn:schac:homeOrganizationType:eu:higherEducationInstitution

urn:schac:homeOrganizationType:eu:educationInstitution

### Outdated contact address on cover page

[refeds@terena.org](mailto:refeds@terena.org)

### Broken link to TF-EMC2 on page 3

A missing '>' at the end of the link:

TF-EMC2 <<http://www.terena.org/activities/tf-emc2>and

### Use the more specific ISO3166-2 reference

- schacCountryOfCitizenship on page 7
- schacHomeOrganizationType on page 10
- schacCountryOfResidence on page 10
- schacPersonalPosition on page 12
- schacPersonalUniqueCode on page 13
- schacPersonalUniqueID on page 14
- schacPersonalPosition on page 17

ISO 3166-2 is the correct specification for the two-character ISO3166 spec.

## LDAP schema: [schac v: 20150413-1.5.0](#)

### Eight outdated URN Registry References

In all eight cases the reference to the URN registry is labeled as 'TERENA URN Registry' and the URL has the outdated prefix:

- schacHomeOrganizationType
- schacPersonalPosition (twice)
- schacPersonalUniqueCode
- schacPersonalUniqueID
- schacUserStatus
- schacProjectMembership
- schacProjectSpecificRole

Wrong

TERENA URN Registry

<http://www.terena.org/registry/terena.org/schac/>

Correct

SCHAC URN Registry

<https://wiki.refeds.org/display/STAN/SCHAC+URN+Registry/>

### **Outdated URNs in comments**

There are 27 occurrences of example URNs using the outdated prefix

Wrong

`urn:mace:terena.org:schac`

Correct

`urn:schac`
