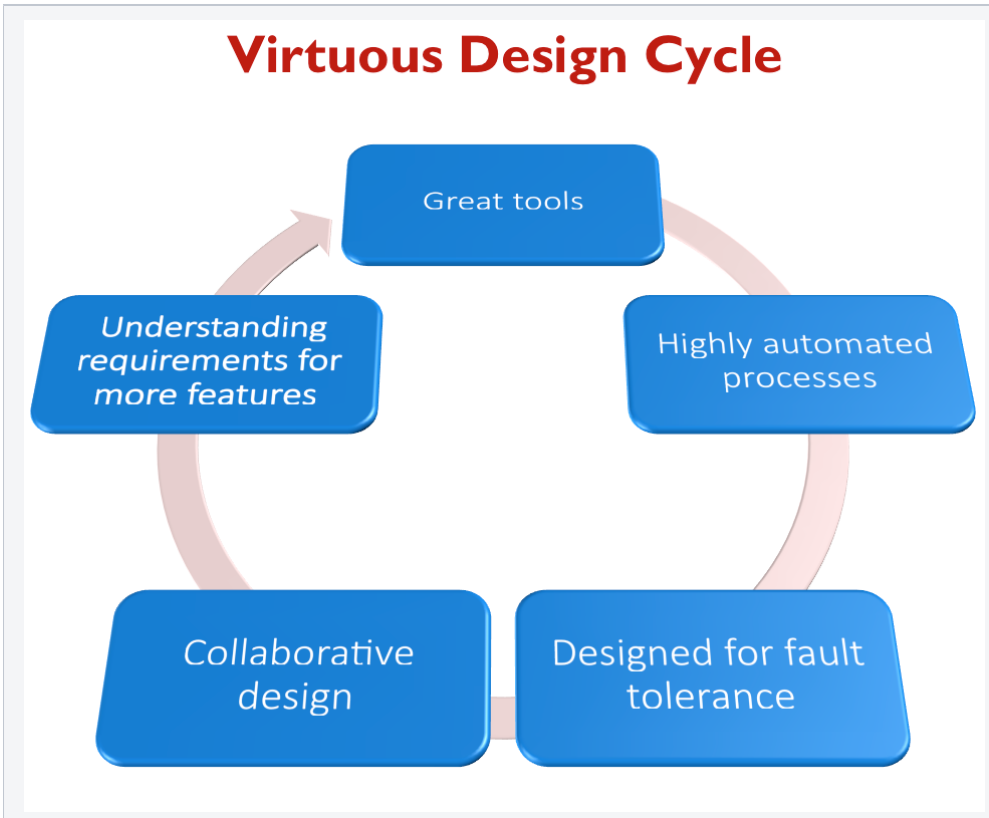
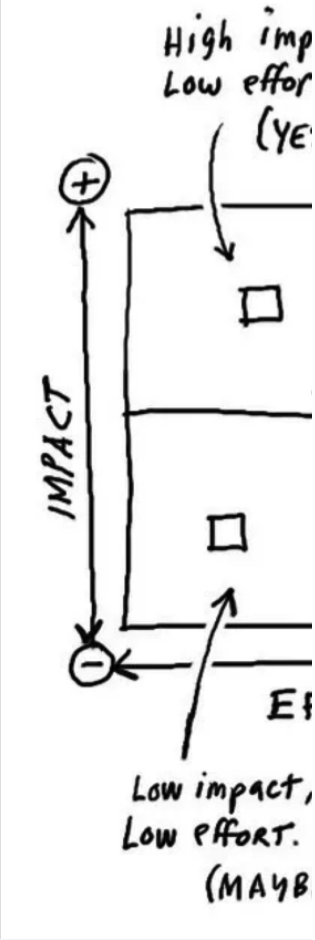
Incubator

Welcome to the space for tools-incubator / fed-ops-dev-ops activities.

It's called incubator as it could be any nascent activity that has yet to find a home and a way to have the conversation publicly.

Activities pursue two main themes: iterate on the virtuous design cycle and be 'up and to the left' in the impact vs effort work assessment





Activities

Deploying Metadata Query

Improving Metadata Quality

Sustainable Discovery Services

Easing IdP deployment techniques

Security Posture Assessment

OIDC/SAML Integration

Draft Materials

Push-MDQ idea from TIIME 2017 (Leif, Nick, Scott K)

DS In The Sky (with telemetry) from TIIME 2017 (Leif, Nick, Scott K)
