- To agree if consensus was reached and if response to the consultation was appropriate.

Discussion items

Time	Item	Who	Notes
	Welcomes, can you hear me now?	Nicole	Nicole gave a brief introduction and explained the process for considering each of the change requests on the wiki.
30 - 40 mins	Review of change requests	Nicole	The change requests were reviewed and updated on the consultation page. Entity Category Consultation: Research and Scholarship 2 . Actions from the change requests are shown below.
5 mins	Consensus?	Nicole	Attendees on the call were happy that consensus had been reached on implementing a clarification and publishing R&S v1.3 subject to the minor clarifications discussed on the call. Nicole explained that the next step was to take the new proposal to the REFEDS Steering Committee for approval.

Action items

- ✓ Change text in section 7 to: "...release all required attributes in the bundle defined in Section 5 to all R&S Service Providers, **either automatically or subject to user consent or notification**, without administrative involvement by any party."
- ✓ Change text in section 1 to: "Identity Providers may indicate support for Service Providers in this category (self-assertion is the typical approach used by this is not the only acceptable method)"
- ✓ Change text in section 4.1 to: "The service enhances the research and scholarship activities of some subset of the user community."
- ✓ Change text in section 4.3.3 to: "4.3.3 The Service Provider provides an `mdui:DisplayName` and `mdui:InformationURL` in metadata (an english language version `xml:lang="en"` is strongly recommended)."
- ✓ Update the FAQ to include the following: clarity on use of both EPPN and EPTID, comments on multi-valued attributes, information that clarifies that there may be barriers (consent, absence of information in IDM systems) that means all attributes will not be delivered.
- ✓ Add wording clarification "In possessing the Entity Category Attribute with the above value, a Service Provider claims that it will not use attributes for purposes that fall outside of the service definition, *as presented at the time of registration to its users and referred to in metadata.*"
