2016-10-20 ORCID WG Meeting notes

Date

20 Oct 2016

Attendees

WORKING GROUP: ORCID

- Laura Paglione
- Miroslav Milinovi
- Chris Phillips
- Tom Demeranville
- Heather Flanagan

Goals

- Review the ORCID as IdP Discussion topic, and progress discussion about it

Discussion items

Time	Item	Who	Notes
	ORCID as attribute authority	Miro	- Use case - getting information about a user, while not necessarily having to go to ORCID for that info - We need to allow the user to link the identities - Show that the iD is mapped to the appropriate identity - ORCID as attribute authority is desired - RESOURCE: Islandora (repository SW)
			- ORCID is being treated as an IdP - Difference between being in a circle of trust, and the concept of control
			Looking at the work items on the ORCID 1. ORCID as IdP a. Provide community input: subject matter expert point of view. ORCID would use this information 2. ORCID as a service provider - federation promotion a. Working group provide recommendation / insight for what user should do b. transparency is important 3. Working with MACE to promote the use of eduPersonORCID a. Output - report Report with supporting materials

+1 for attribute authority.

chris phillips muted you.

sometimes the 'user linking' looks -- ok, IS, a login: https://zenodo.org/login/

interesting linkage with open-aire Miro.
that's secondary though. Zenodo is using it as a login primarily
BTW Islandora's creator works with CANARIE via Research Data Canada (RDC) (Mark Leggott) and we've been talking with them about fedSSO
FWIW, I don't want to shackle either Federated ID OR ORCID in what makes sense. --It's the 'what makes sense part' I think needs clarity

12:27 PM

beyond scope: ORCID ingesting the output and altering things (ORCIDs call of course)
what's the time horizon of the group.. interesting question?
What deliverable time should we drive for? TNC17 (May 28,2017)?

Heather Flanagan

12:36 PM

The WG can run only as long as there is community interest and action.
And the longer it takes, the more likely the community will lose focus.

12:37 PM

@heather -- agreed. I think shooting for a delivery date is easier and can help guide effort

---

Tom Demeranville

12:37 PM

I like the idea of terena as a deadline.
(not that work has to finish then!)

---

blocked URL
Heather Flanagan

12:40 PM

That's fine
No, I'm in Eugene at the moment
In an open office, though, thus the mute
You can use other tools for drafting, but keeping a copy on the wiki is good for record keeping.
Think of it this way: once a month would be only seven calls between now and TNC
assuming none were missed for holidays.
With two calls a month, maybe a EU/US call time, and an Asian friendly call time?

12:47 PM

It would be good to get aaf involved, so this is a good idea.

12:52 PM

I would aim more, in terms of time, to UTC 9pm, PDT 2pm, Sydney 8am.
It's at least not ungodly early or late for anyone.
one hour earlier would work, too

Heather Flanagan

12:58 PM

I won't be on all the calls, and it won't be hideous regardless
5am, that's hideous. But split the calls, that's fair to most
/me scowls
no one should have to be up at 5am. It's BEFORE COFFEE.

Heather Flanagan

1:02 PM

thanks, will do.

Action items

- ☑ Tom Demeranville create an outline of final report (terms & reference) - Suggestion: use Google Docs for the outline tool

- ☑ Working group to create a report with supporting materials completed in time for TNC17 (May 2017)

- ☑ Laura Paglione propose a topic for TNC17 for presentation

- ☐ Tom Demeranville Set meetings - Every 2 weeks between now and May (UTC 9pm, PDT 2pm, Sydney 8am, 8am EDT is 2pm CEST, 5am PDT 4am Australia, timezone helper: http://www.worldtimebuddy.com/?pl=1&lid=12,5,2147714,5809844&h=12)

- ☐ Miroslav Milinovi Do some technical tests to show what might be done, RE attribute authority - Tom Demeranville to send some technical information for Miro to use for reference
